

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Diphtheria at Lubec, Me.—Spread of the disease arrested.

Acting Assistant Surgeon Small, at Eastport, Me., reports, November 3, as follows:

The spread of diphtheria at Lubec, Me., is at present arrested. There have been about 20 cases of mild type. No new houses quarantined for nearly a week. I trust the epidemic is over.

*Transactions on account of yellow fever at Laredo, Tex.**Reports from San Antonio—Sanitary conditions—Work of the sanitary department during October, 1904—Mortality.*

Acting Assistant Surgeon Purnell reports, November 3, as follows:

The health of the city and vicinity is very good, and there seems to be no special disease prevailing. The temperature dropped considerably several days ago, but the cool weather was only temporary, as the summer warmth has returned.

Work of the sanitary department during October, 1904.
